🪪 Profile

Hi! I'm a seasoned Software Engineer with 6 years of industry experience. My passion lies in crafting efficient solutions and collaborating with teams to tackle complex challenges. I like to stay proactive and grab opportunities to expand my horizon and learn new things. Starting my career as an IBMi developer, I have expanded my skillset to java development as well. Whether it's debugging, creating new features or troubleshooting architectural issues, I am always up for challenge.

🎓 Education

Bachelor of Technology - Electronics and Telecommunications
SJC Institute of Technology
2014 - 2018 | Chikballapur

Higher Secondary
Vijaya Chetana Science PU College
2012 - 2014 | Chikballapur

Secondary
Quite Corner Public School
2012 | Chikballapur

💼 Professional Experience

FIS

Senior Software Engineer
07/2024 - present | Bengaluru

- Develop robust and efficient programs for various features/projects from analysis phase, finalizing requirement, testing and release notes in an agile environment.
- Understand, debug and collaborate with business analysts to knock off complex client reported defects/issues.
- Collaborate with team to get the things done in the sprint and complete assigned items on time.
- Understand and bring the logic to java - hence develop new java classes and methods to mimic the RPGLE logic.
- Develop SQL queries to mimic the logic involved in RPGLE wherever possible.
- Be a part of release management team and involve in Administrative activities.

Lead Engineer
02/2022 - 06/2024 | Bengaluru

  Same as Above

LTIMindtree

Senior Software Engineer
08/2020 - 01/2022 | Bengaluru

- Developed internal tool for project management, which provided a dashboard with all the ongoing projects and their go live dates, expected delivery dates and colour coded indication.
- Worked on Supply Chain management domain - hence worked with its life cycle of order creation, order management, shipment creation based on inventory, customer creation, Direct shipment etc.
- Worked on creating webservices to attend to the api calls from client side.
- Worked on several features, defects, analysis and documentation tasks etc.
- Be a part of team that tackled long standing issues which reported to higher management.

🥧 Release management and Admin activities

> **Administrative activities:** Monitor ASP%, generate reports and clean up old journals and files. | ALDON - Creating releases, merging releases to parent, code promotions and retrofits.

> **Release management:** Part of release management team which involved filtering accepted items and merging/applying code to Quality and also create release packages to the clients as and when required. |
> Generate code scan reports using third party tool (Checkmarx) for releases.

📑 Certificates and Achievements

Achieved multiple recognition awards such as 'Master Mind Award','HatsOff Award' ,'A-Team' , and several 'Spot-On' awards. ●
Recognized as Top talent in both the performance reviews in LTi Mindtree LTD. ●
Recognized as Exceptional Performer in the performance review cycles at FIS ●
Trained in AS400 and SQL/DB2 by Mindtree for 3 Months. ●
Earned SQLRPGLE, ILE course certifications from FutureSkills .Ltd. ●
Java Algorithms certification from LinkedIn Learning ●
Earned certificates on GCP Fundamentals and Big data Fundamentals from Coursera.

- Take part in usual software development cycle of requirement gathering, technical specifications document creation, design and development, testing and documentation.

Software Engineer
06/2018 - 07/2020 | Bengaluru, India
  Same as above.

🧠 Skills

IBMi, iSeries, AS/400   ● ● ● ● ○
Proficient in coding in languages in RPGLE, ILE, SQLRPGLE, CLLE.

Java, SQL, Object oriented programming.   ● ● ● ○ ○
- Understand and write complex java code and SQL queries.
- Convert RPGLE to Java by debug and analysis of RPGLE programs.
- Build SQL queries to mimic the logic in RPGLE programs wherever possible.

Co-Pilot for java and IBMi   ● ● ● ● ○
Use github co-pilot to develop new programs and explore ideas on IBMi and java.

Tools
- Eclipse, VS code for coding Java and IBMi (RPGLE, CLLE, SQL)
- APLUS and Hawkeye for analysis
- Aldon, Turnover for code management
- Rally, Jira for project management.
